Index

Introduction

What is Rapid Fire Renamer?
Rapid Fire Renamer is a Unity Editor tool that allows the user to easily rename files in your unity project.
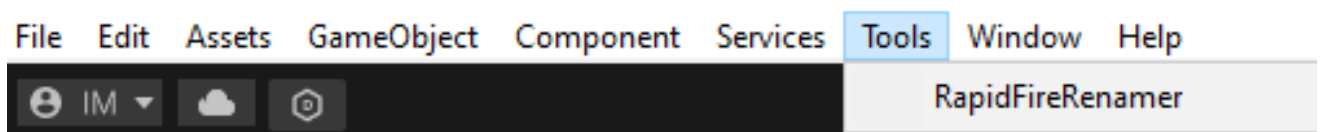

Features
- **Renaming** multiple files at the same time.
- Adding a **prefix** and/or a **suffix**.
- Removing a **prefix** and/or a **suffix**.
- **Replacing** a part of an files name with a other.
- Automatic **incrementation** when naming files the same name.
- **Preview** of the new name of the file.
- **Changelog** that shows you which files were changed and to what

How to import the package.
- ~~Option 1: Add the package to your asset on the unity Asset store and import the package with the Unity Package Manager.~~ (Not Published)
- Option 2: Run the unity package while a Unity project is open
- Option 3: Import the package into the project manually.

How to access the tool.
You can easily locate the tool within Unity by accessing the navigation bar at the top of the interface. Look for the tab labeled "**Tools**" and select "**RapidFireRenamer**" from the dropdown menu.

File   Edit   Assets   GameObject   Component   Services   Tools   Window   Help

RapidFireRenamer

You can currently not rename Game Objects in your scene this will be added in a future version.
Rename

Info
The rename tab allows you to rename the file and add/remove prefixes and suffixes.

Name
New Name:
In the designated "New Name" field, you can enter the desired name for the file.

## Incrementation
Incrementation affixe:
In the dropdown menu labeled "Incrementation Affixe," you have the option to choose whether the incrementation should be added as a prefix or suffix to the file name.

Start Incrementation:
In the "Start Incrementation" field, you can specify the initial number from which the incrementation will begin.

Increment By:
In the "Increment By" field, you can enter the value that will be added with each incrementation.

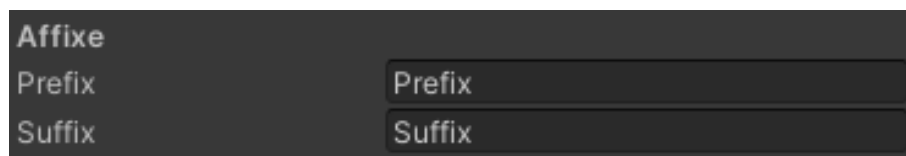

Affixes
Prefix:
In the "Prefix" field, you can enter the desired prefix that will be added to the file name during the renaming process.

Suffix:
In the "Suffix" field, you can enter the desired suffix that will be added to the file name during the renaming process.

Buttons

- **Full Rename**: Will use all filled-in parameters and will use incrementation when there is more than one file selected.
- **Add Prefix**: The current prefix filled-in will be added to the names of the selected files.
- **Remove First Prefix:** The first prefix will be removed from the names of the selected files.
- **Add Suffix:** The current filled-in suffix will be added to the names of the selected files.
- **Remove last suffix:** The last suffix will be removed from the names of the selected files.

Tab

Replace

Info
The "Replace" tab provides a convenient way to substitute one word with another in the current file name.

Replace
Word to Replace:
In the "Word to Replace" field, you can specify the word that you wish to replace with a new one.

Replacement Word:
In the "Replacement Word" field, you can specify the word that will be used to replace the old one.

Case Sensitive:
In the "Case Sensitive" field, you have the option to enable or disable case sensitivity for the replacement process.

Buttons
- **Replace:** The filled-in parameters will be used to replace and modify the file name accordingly.
